SUMMARY

AI-ML undergraduate with experience in Python development, machine learning, and full-stack web application development. Built projects including an online voting platform, an agricultural market price prediction system, and a student attendance management application using Flask, JavaScript, and machine learning. Passionate about developing practical software solutions by combining AI with modern web technologies.

EDUCATION

Shri Madhwa Vadiraja Institute of Technology

Bachelor of Engineering in Artificial Intelligence and Machine Learning

2023 – 2027

Udupi, Karnataka

SKILLS

Languages : Python, JavaScript, C, Java, SQL

AI & Machine Learning : TensorFlow, Keras, scikit-learn

Data Analysis : Pandas, NumPy, Matplotlib, Seaborn

Full-Stack & DevOps : Flask, FastAPI, React, Node.js, Docker, Git & GitHub

Databases & Cloud : MySQL, MongoDB, Firebase, Vercel

PROJECTS

Online Voting Platform | *Flask, HTML, CSS, JavaScript*

[GitHub](#)

- Developed a secure web-based online voting system using Flask, HTML, CSS, and JavaScript.
- Implemented user authentication and vote management to ensure fair and secure elections.
- Designed a responsive interface for seamless voting and efficient result management.

Agritech Market Price Prediction | *Python, Flask, Machine Learning*

[GitHub](#)

- Built a machine learning application to predict agricultural market prices using historical crop data.
- Developed the backend using Python and Flask with an intuitive web interface.
- Applied data preprocessing, model training, and visualization techniques to generate price forecasts.

Student Late Comers Record System | *Python, Web Development, Databases*

[GitHub](#)

- Developed a web application to maintain and monitor records of students reporting late to class.
- Implemented CRUD operations for efficient management of student records and attendance history.
- Built the application with a focus on usability, data organization, and quick record retrieval.

Smart Civic Connect | *Full-Stack, Web Application*

[GitHub](#)

- Developed a full-stack platform for citizens to report and track civic issues including roads, water, electricity, and sanitation.
- Built a responsive Glassmorphism UI with an admin dashboard for reviewing and resolving complaints.

Smart Krishi | *Python, Agriculture Tech, Web Application*

[GitHub](#)

- Developed an agriculture platform for crop information, market prices, and farming recommendations.
- Implemented crop selection and market price features to support data-driven farming decisions.
